

EHS POLICY

We are committed to manufacture and supply pharmaceutical formulations with due respect to the environment, health, safety and legal requirements associated, not only to our operations but, also to our entire workforce.

We shall effectively demonstrate the implementation and continual improvement of environmental, occupational, health and safety management systems through awareness, sharing information, training, provision of resources, periodic reviews, monitoring and measurement, prevention of incidents, conservation and promotion of environment through tree plantation, rain water harvesting, waste reduction and recovery of solvents/chemicals.

At Supreme Health, we are committed to integrating system and processes for the environment and safety principles into our operations, management processes and products and, achieving an incident-free, injury-free environment for our employees and contractors.

We aim to use natural resources efficiently and by way of constant monitoring and preventive actions, minimize the environmental impacts of our activities and products during their life cycles. We ensure this through well designed systematic storage and use of chemicals, safe disposal of effluent material, control of gas emission and by adopting methods of resource conservation such as, recycling of water at our plants.

We at Supreme Health shall strive and endeavour to do all that it takes to reduce the carbon footprint and contribute as much as possible in reducing environmental hazards that our planet is facing.
